Apache™ FOP Version 1.1rc1

$Revision$

Table of contents

1 Introduction

This is Release Candidate 1 (rc1) of an upcoming minor (dot) release of FOP. FOP 1.1rc1 contains many bux fixes and a number of improvements, including important features such as support for Complex Scripts (e.g., Arabic, Hebrew, Indic, and Southeast Asian scripts). To see what has changed since the last release, please visit Release Notes.

This release implements a substantial subset of the W3C XSL-FO 1.1 Recommendation. For a detailed overview of FOP's compliance with this recommendation, see Compliance.

2 Upgrading from an earlier version

If you're upgrading to this version from an earlier version of FOP, please read the information on Upgrading!
